

Alienware Reputation

"We have used Alienware desktops and laptops extensively for our research on interactive 3D graphics and GPU-based computation. They have worked very well and have given us the highest performance for our research and development. These are well designed and integrated machines."

Dinesh Manocha,
Professor, Computer Science, University of North Carolina at Chapel Hill

"From what I have seen, the systems provided by Alienware have more than met our expectations. We currently use each system (with the Parhelia triple monitor video card) to drive our projector screens. Each projector screens has 1/3 of the screen displayed by one projector, for a total of 3 projectors. Setting up the system to use the 3 projectors to display one large virtual desktop was easier than anyone expected. Not only was the system easy to setup, but the performance of said system is awesome, to say the least! Our most complex media presentations are handled without the slightest 'hiccup'."

Daniel Greve
Northrop Grumman Integrated Systems

"Alienware systems deliver leading-edge performance."

Gabe Newell,
Founder/Managing Director, Valve®

"I am extremely happy with my recent purchase from Alienware®. Their computers are of the upmost standards. They sure make kick-ass graphics. I'm now a loyal customer, no doubt."

Dale Earnhardt Jr.

"Through an extensive bid process, Alienware was chosen because they had exceptional quality and reliability while running intensive applications, 24/7 customer support by specially trained personnel, availability of customized configurations to meet FIU's requirements, and the best overall value."

George S. Dulikravich, Ph.D.,
Professor and Chairman of the Department of Mechanical and Materials Engineering, Florida International University

"The opportunity arose to demonstrate my Apollo lunar landing simulation Eagle Lander 3D to the commander of Apollo 17: Gene Cernan. Luckily I had my Area-51m with the graphics capability to show the features as they might have appeared on a high powered desktop. Very few laptops have the power necessary for high power 3D graphics applications and I was very happy I had my Area-51m along."

Ronald Monsen,
President, Go for Landing LLC

"Our Alienware box is amazing. Lately, we've been using it to demo our holiday line-up to press and partners, and it never fails to impress!"

Christopher Lye,
Product Manager, Microsoft PC Games

"My students thoroughly enjoyed seeing your state-of-the-art assembly and testing process. Alienware is one of the top computer manufacturers in the field and for students to see their business process at work gives them something to aspire to and hopefully one day emulate. Students know that in business, to be the best, they have to learn from the best."

Alvaro Hoyos
Instructor, Florida Career College
