

# Alienware® Video Array

## **Description:**

Alienware's exclusive Video Array Technology works with a proprietary motherboard to deliver estimated performance gains at 50+% over current graphics solutions. Alienware's Video Array Technology was designed to enhance performance for graphics-intensive applications including extreme gaming, professional design and engineering, real-time rendering and animation, and flight training and simulation modules. The Alienware Video Array Technology and X2 motherboard will be available exclusively through Alienware's new ALX brand, a family of extreme performance systems catering to the demands of the most hardcore PC enthusiasts. With the Alienware Video Array Technology, customers can:

- Expect significant performance improvements in gaming and graphics-intensive applications
- Expect a 50+% performance gain over traditional graphics solutions
- Play the latest extreme gaming titles at optimal performance levels
- Render 3D visuals at amazing speeds
- Flawlessly run flight training and simulation modules
- Create intensive graphic animations
